TECHNICAL SKILLS

Mobile: Flutter, Dart, Clean Architecture, MVVM, Riverpod, Provider, GetIt, Retrofit, .Net Maui, C#
Backend: NestJS, Node.js, TypeScript, PostgreSQL, MySQL, Drizzle ORM, REST APIs, JWT, Redis
Integrations: REST APIs (Retrofit + Dio), PayMongo, Facebook Graph API, WebSocket/Socket.IO, Firebase, OpenStreetMap
Tools: GitHub Actions (CI/CD), Firebase App Distribution, Git/GitHub, Postman, Android Studio, Xcode, VSCode

EXPERIENCE

IT Specialist – Mobile & Desktop Developer

LCC Group of Companies | July 2026 – Present

- Cross-Platform Application Maintenance:** Maintain and stabilize enterprise .NET MAUI mobile(Andriod) and Desktop application used daily by 100+ staff across 5+ warehouse and retail locations, taking ownership of app reliability, bug fixing, and scanner integrations.
- Offline State & Data Reliability:** Refactored C# local SQLite caching overlays to maintain local UI state during live reloads, eliminating data loss and network sync-race conditions during active warehouse operations.
- Barcode Hardware & Catalog Resolution:** Implemented custom catalog lookup logic and automated integration tests to map hardware UPC scans to inventory items, preventing data validation errors during stock processing.

Software Developer Intern (OJT)

Quanby Solution, Inc. | Payroll Management System | Feb – May 2026

- End-to-End Module Delivery:** Developed and integrated 11 full-stack modules end-to-end, from NestJS/PostgreSQL backend to Next.js frontend, covering auth, employee management, attendance, leave, overtime, payroll, and more.
- Testing & Compliance:** Conducted end-to-end testing across all modules and implemented audit logging and idle session timeout for security and compliance.

PROJECTS

MyNagAlaga: Government Services Platform

Mobile Developer

Grand Winner – 1st Naga City Mayoral Hackathon, Social Services Challenge | 2026

- Built the citizen-facing Flutter app for Naga City's welfare and disaster response services using Clean Architecture with Riverpod, and Retrofit + Dio for type-safe API integration. Winning the Social Services Challenge at the city's first Mayoral Hackathon.
- Integrated the OpenStreetMap API to route users to the nearest evacuation center via proximity evaluation with interactive route display, replacing manual hotline lookups during emergencies.
- Implemented the Digital Badge module for citizen identity verification across welfare and disaster response workflows.

ElecXus: Consumer Service Management System

Full Stack Developer | Capstone Project | Aug – Nov 2025

- Built the Flutter app that gives electric cooperative consumers self-service billing, payments, and complaint filing with map-based location tagging, replacing in-person office visits.
- Integrated the PayMongo API end-to-end (GCash, Maya, GrabPay, Cards) across app and backend, including webhook handling for payment confirmation and failure states.
- Delivered real-time complaint status updates over Socket.IO with Firebase Cloud Messaging push notifications, and pulled outage advisories from the cooperative's Facebook page using the Graph API.

EatEase: Food Ordering Mobile Application

Full Stack Developer | Jan – Mar 2025

- Built the Flutter app with live order tracking, in-app customer–vendor chat over WebSocket, and PayMongo checkout, backed by a Node.js/MongoDB API handling orders and payment webhooks.

EDUCATION

Bachelor of Science in Information Technology

Bicol University College of Science, Legazpi | 2022 – 2026
